

## Soil Fertility Management for Sustainable Agriculture

James F Power and Rajendra Prasad

CRC Press 1997

384 pages ISBN 1566702542 £45.00

Sustainability of agricultural systems is a major global concern due to population growth and a number of environmental factors. This book addresses the key to the development of sustainable agriculture—management of soil fertility. Combining data from temperate and tropical regions, it presents a complete picture of how various soils can best be managed under widely different environmental conditions. *Soil Fertility Management for Sustainable Agriculture* is an excellent reference for environmental and agricultural professionals as well as a textbook for undergraduate and graduate students preparing for a career in agriculture or soil fertility management.

### Contents

- Introduction
- Sustainable Agriculture: Definitions and Goals
- Factors Determining Sustainability
- Soil Fertility
- Essential Plant Nutrients
- Criteria for Essentiality
- Basis for Classification of Nutrients as Primary, Secondary, and Micronutrients
- Primary Nutrients, Secondary Nutrients, and Micronutrients
- Functions of Essential Nutrients in Plants
- Soil the Sustainer
- Soil Organic Matter
- Soil Water
- Soil Air
- Soil Mineral Matter
- Soil Colloids
- Soil Living Organisms
- Soil Colloids
- Clay Minerals
- Oxide Minerals
- Organic Matter
- Humus, Its Structure and Properties
- C:N Ratio
- Factors Affecting the Organic-Matter Content of Soils
- Soil Acidity
- Acids
- The pH Concept
- Determination of Soil pH
- Active and Potential Acidity
- Buffering Capacity
- Nature of Soil Acidity
- Factors Affecting Soil Acidity
- Soil pH and Crop Production
- Lime Requirement
- Liming Materials
- Fineness of Limestone
- Soil Salinity and Sodicity
- Coverage and Special Features

- Criteria for Determining Salinity/Sodicity
- Classification
- Reclamation and Management of Saline Soils
- Crop Production on Saline Soils
- Reclamation and Management of Sodic Soils
- Crop Production on Sodic Soils
- Nitrogen
- Soil Organic N
- Mineralization of Soil Organic Nitrogen
- Factors Affecting Nitrification
- Nitrogen Immobilization
- Ammonium Fixation (Nonexchangeable Ammonium)
- NH<sub>4</sub> vs. NO<sub>3</sub>- Nutrition of Plants
- Biological Nitrogen Fixation
- Nitrogen Fertilizers or Industrial Nitrogen Fixation
- Efficient Nitrogen Management
- Increasing N Use Efficiency
- Nitrogen Availability Indices
- Nitrogen-Deficiency Symptoms
- Phosphorus
- Soil Phosphorus
- Phosphate Retention or Fixation in Soil
- Factors Affecting the Retention of Phosphorus by Soil
- Phosphate Fertilizer Reaction Products in Soil
- Intensity (I) and Quantity (Q) Factors in Phosphorus Availability
- Soil Testing for Phosphorus
- Phosphorus-Deficiency Symptoms in Plants
- Phosphate Fertilizers
- Efficient Phosphate Management
- Potassium
- Forms of Soil Potassium
- Quantity/Intensity Relationships
- Potassium Fixation
- Leaching of Potassium
- Potassium Fertilizers
- Efficient Use of Potassium Fertilizers
- Sulfur
- Sulfur in Soils
- Sulfur and Its Oxidation
- Oxidation of Pyrites
- Assessing S Needs of Soil
- Sulfur Deficiency Symptoms in Plants
- Sulfur Needs of Crops
- Sulfur Fertilization
- Calcium and Magnesium
- Calcium and Magnesium in Soil
- Factors Affecting the Availability of Calcium and Magnesium in Soils
- Leaching of Calcium and Magnesium
- Determining Available Calcium and Magnesium
- Calcium and Magnesium Deficiency Symptoms
- Calcium and Magnesium Amendments
- Iron and Manganese
- Amounts and Forms of Iron and Manganese
- Soil Solution Iron and Manganese
- Factors Affecting Iron and Manganese Availability
- Soil Tests for Iron and Manganese
- Deficiency Symptoms of Iron and Manganese
- Toxicity Symptoms of Iron and Manganese
- Iron and Manganese Fertilizers
- Copper and Zinc
- Amounts in Soil
- Forms of Copper and Zinc in Soils
- Factors Affecting the Availability of Copper and Zinc
- Soil Tests for Copper and Zinc
- Deficiency Symptoms in Plants

- Deficiency Symptoms in Plants
- Copper and Zinc Fertilizers
- Boron and Molybdenum
- Boron
- Molybdenum
- Chlorine
- Chlorine in Soils
- Addition of Chlorine to Soils
- Testing Soils for Chlorine Deficiency
- Chlorine Deficiency Symptoms
- Chlorine Toxicity Symptoms
- Interactions with Other Nutrients
- Chlorides and Plant Diseases
- Crop Responses to Chloride Fertilization
- Chloride Fertilizers
- Beneficial Elements
- Sodium
- Silicon
- Cobalt
- Nickel
- Aluminum
- Vanadium, Lanthanum, and Cerium
- Nutrient Interactions
- Interactions
- Interactions of Primary Macronutrients
- Interactions of Micronutrients
- Organic Manures
- Crop Residues
- Animal Manures
- Composting
- Organic Farming
- Integrated Nutrient Management
- Cropping Systems, Soil Fertility, and Fertilizer Use
- Legumes in Crop Rotations
- Intercropping Systems
- Intensive Cropping Systems and Soil Fertility
- Fertilizer Application in Cropping Systems
- Index
